To Whom It May Concern

Declaration of Non Mulesing and supply from Chilean Farms

Jacomb Hoare (Bradford), a division of Standard Wool (UK) Ltd since 1985, has been trading wool in Punta Arenas, (Magallanes region of Chile) for over 200 years. We regularly purchase 70% of clip and process the greasy wool in our Combing plant located in Punta Arenas.

We buy from farm within Chile where the wool has grown in Chile, shorn in Chile and delivered to our local Wool Processing Plant where we carefully select the various types of wool before processing the wool into a Top product which meets the criteria of our client.

As a responsible trader we consider all aspects of sheep husbandry, breeding, shearing and animal welfare to be important in the selection and purchase of our raw material.

As your supplier of Punta Arenas Tops and Noils we can categorically confirm that the use of mulesing, a sheep husbandry practice used to control the blowfly strike in sheep is not carried out in Chile.

I attach a certificate from the S.A.G (the Chilean Government's dept, equivalent to the UK's DEFRA), dated 31/01/2019 which confirms that Chilean Wool is Mulesing Free.

Yours sincerely,

Rebecca Spinks-Carter
